General Care and Cleaning of Your Rings

General Care

A Ring of Oden is designed to be gently touching or slightly overlapped. If your Ring gets bent slightly open, gently bend it closed.

It is best not to use your Rings of Oden in a dark or poorly lit room. The Rings draw energy from the **light**.

Do not let your Rings of Oden come in contact with magnets or near AC/DC currents, nor store the Rings near these. Do not wear magnets, Q-link, Tachyon, or other electronic or charged products while working with the Rings. Their energies may be amplified beyond what is needed by the user.

Do not allow the Rings of Oden to be scanned by X-ray or electromagnetic scanners. These will wipe out the Rings' energy.

Deflector bags protect the Rings from X-ray damage during mailing or air travel. If you purchased your Rings by mail, these were shipped in a deflector bag. **Do not store the Rings long-term in the deflector bags!** Remove them as quickly as possible to allow them to normalize. The bags are reusable unless punctured. If you are mailing your Rings or traveling by air and need bags, you may purchase them at a nominal cost from *The Way To Balance*.

Store the Rings in a place where they are not in direct contact with your body. The Rings should have air around them, and may be kept in a container such as an open box.

Cleaning

No cleaning or polishing is ever needed. However, if you would like to bring back their shine, use only liquid Wright's Jewelry Cleaner or a similar non-abrasive cleaner. Rinse under running water and pat dry. Excessive rubbing may cause a slight discharge of the net-neutral ions in the Ring.
