

## Product Review by Ron Damico

**Balance: A Master Biomorph Geometric Card**  
 Developed by: Aaron and Sue Singletown,  
 Co-founders of The Way To Balance, LLC  
 ISBN: 978-834-0341  
[www.TheWayToBalance.com](http://www.TheWayToBalance.com)

I am always interested in products that support the people in the engaging of their own healing/awakening/becoming process. Unfortunately, many have the best of Intension, but miss the mark. The Way To Balance Biomorph Balance Card is all it was created to be. This card is amazing. It is only as limited as your willingness to explore, in a grounded way, and experience yourself and your own healing potential beyond how you have experienced it before. Before I share my experience I'm going to share with you some technical info, from the card manual, about the card and how it does what it does.

Biomorphic Geometry (BMG) is a groundbreaking new science and technology that enables a person to experience a shift within his or her conscious mind, unconscious mind, and body. This is because our human bodies - all the way down to the level of our DNA - can read and respond to the energy frequencies created by the Biomorph Geometry (BMG) Design Cards.

The extensive research and decades of hands-on energy work with thousands of clients has led them to discover and develop their new, free-form geometry that arranges key geometric components (including radii, diameters, arcs, chords, tangents, angles, triangles, circles, squares, rectangles, sine waves, symbols and numbers) in very specific placements and proximity to each other.

This new science of Biomorph Geometry, and the specific BMG Designs that the Singletons have created, enable a person to experience a shift within his or her conscious mind, unconscious mind, and body. This again, is because our human bodies, all the way down to the level of our DNA, can "read" and respond to the energy frequencies created by the Biomorph Geometry (BMG) Design Cards.

Each unique BMG Design Card is developed to create a resonating morphic field that identifies imbalances in your DNA, brain, body and bioplasmic field, and creates an opportunity for you to correct the imbalance and release. For example, if you carry interference or a blockage to "Peace", it will draw your attention (unconsciously or consciously) to the area of interference or blockage, giving you the opportunity to acknowledge and release it.

The Biomorph Geometry field is comparable to a radio wave that carries information. The frequencies of the fields are created by patterns, shapes, numbers, etc. and their relationship to each other. These card have broad applications in the fields of psychology, psychotherapy, bodywork, energy healing, hypnotherapy, guided imagery, dowsing, kinesiology, intuitive development, and more.

Why is it called Biomorph Geometry?

Bio, as in biology: Of, relating to, caused by, or affecting life or living organisms.

Morphic: Able to transform or to be transformed completely in appearance or character. Morphic also means morphic resonance, the concept that through a telepathic effect (morphic field), information can be transferred to an organism through a sympathetic vibration.

Geometry: The mathematics of the properties, measurements, and relationships of numbers, points, lines, angles, surfaces, solids, and higher dimensional representations.

Thus, Biomorph Geometry uses the frequencies of sets of shapes and forms designed to create unique morphic fields that initiate transformational change within living organisms.

The BMG Design Cards create frequencies that "light up" the conscious and unconscious areas within the body that block a person from experiencing a specific state of being. It is not important that you feel, see or "know" anything at all when using the cards. The body, unconscious or conscious mind, DNA and bioplasmic field all read the resonating biomorph field emitted by the card. The frequencies in the cards allow for the shift to take place by your simple

willingness. Hence, before beginning, it can help to relax and let go, offer a brief prayer or meditation about your willingness to resolve imbalances.

The dimensions of each design are critical to the accuracy of the BMG Design Cards and their ability to influence the body, brain, DNA and bioplasmic field. Therefore, some designs do not completely fill the card space.

I have been playing with the card for more than a month now, and it has been a joy. This card offers an almost limitless opportunity to support not only a practitioner but it is a great overall tool for self support on your journey to health and wholeness. By itself, the card is easy to use, just place it with the configuration side facing the body, anywhere on the body, and just rest into what the card is transmitting. Another option is to place the card, with the configuration side facing you, up to six feet away, and sit, with any part of your body facing the card, rest and receive. If that is all you do, if not immediately but gradually with use, you will notice changes beginning to present. Because each life form is innately drawn to wholeness, when you use this card, your being will "know" what to do and how to respond to the frequency the card is creating. It's that simple.

Now add to this, using the card's frequency as a carrier wave to bring into the body other frequency generating or emanating items to accentuate the healing process... now, you can truly begin to play with your intuition. For example using essential oils, minerals, crystals, light and sound waves, high quality food supplements... the list is as expansive as you are willing to experience. This opens a new universe of experience and can help dissolve the limitations you may hold within the mind of what is and is not possible.

I have used all of what I just listed either separately or in various combinations during a treatment session and the influence and outcome have been wonderful to experience. I've observed the ease of change within all systems of the person. There is less stress and strain on the body, emotional field, and the bioplasmic field - everything releases, moves and balances with greater ease. While using the card(s) (did I forget to mention you can use more than one card at a time, hmmm?!) I find it creates a greater state of ease for change.

You can also introduce into the DNA, body and bioplasmic field forgotten or limited frequencies, which are innately, part of who we are. For example, Love and Compassion, Grace, Abundance, and Gratitude. You could also introduce "I Am Willing to release the cause of..." and "I Am..." intentions that will further expand an offering of release, reception, and acknowledgement of... the list goes on. If you can feel it and create an intent/focus you can use this card to facilitate its introduction into the being.

What I have found very helpful with our practice is the use of this card for our clients for home use. It is SO VERY simple to use that ANYONE can use it for their own growth and healing. I have offered this to clients with noticeable changes between sessions. It not only provides an opportunity for clearing, healing and growth, it offers them an opportunity to expand and deepen their intuitive nature. With practice and a willingness people begin to feel more stable within their own ability to trust and have faith in what they are feeling within themselves and their environment. You can also use it with children, pets and plants... any living being. Just face the card in their direction while they are at rest and they will receive the benefits of healing and harmonizing their beings. I just began using it with our dogs Kadi and Louie for anxiety. After the first use I noticed a marked change. It is that simple.

As you have read this is quite an expansive tool. If you are looking for a truly effective, expansive, and functional tool for deepening your health and wellbeing this is a worthwhile investment in money and time. It will repay you daily beyond your mind's ability to understand.
